

A Day in My Post-Technological Life (2050s)

Instructions: Read [Everything manifesto questions](#) and imagine a day in your life one billion seconds from now. Create 10 slides (one for each section) You'll have 10 seconds per slide, to **present your day**.

REMEMBER: IMAGINATION > ~~PREDICTION~~

AGE: 57	LOCATION: in Egypt on a farm	WEATHER: Really hot in summer and really cold in winters
---------	---------------------------------	---

1 Wake up & Get ready	wake up at dawn - exercise - prepare breakfast
2 Breakfast time/Read the news	Nutri our breakfast- eggs/some veggies/a source of carbs
3 Commuting using public transportation	preferably a bike if short distances but for long commutes, an on ground train would be ideal
4 At work (or not)	a farmer, an educator, a builder
5 Lunchtime	some grilled chicken and veggies + pasta
6 Buying something (online or not)	will be able to build things with the help of open source communities and 3D printers.
7 After-work (or not)	spend time with my family, my kids, and maybe my grandkids. Host friends when they can visit.
8 Before going to bed	i believe I will be expressing my gratitude for the life we're living.
9 What are you reading about?	being fed down the new big thing from the hand of the biggest corporations
10 If you had 3 extra hours...	"probably sleep more, rest more, recover more" ;)
